Experiences

.NET Developer

myShopi | 2018 - now

At myShopi I mainly work on the backend side. We use technologies like kubernetes, docker, .NET core, graphql. I also work on frontend technologies with mainly ASP.NET and vuejs.

Performance Analyst

The reference | May 2019

Performance analysis and debugging for a drupal CMS hosted on a Kubernetes cluster.

.NET Developer & Technical architect

Agilys | 2011 - 2018

My role at Agilys was first to create the windows & windows phone app of myShopi. After that I worked mainly on the website in ASP.NET and on the Azure infrastructure with service bus, queues, storages, SQL databases to make the back offices and webservices efficient and maintainable... We always worked with up to date technologies. I was also Scrum Master in a team of 8 developers.

Creator & Organizer

DevDay | 2013 - Now

I like events where you can learn new things and have fun with crazy speakers and to improve the community in Belgium, I create an event with 3 friends to make our dream event. We begin with a small group of people and now we have about 300 developers on 2 tracks. Team spirit and organization are the main words to make this events successful.

Internship as a developer

Microsoft Innovation Center Mons | 2011

For my internship I developed Windows Phone 7 applications. My project was a Windows Phone 7 application generator, I created a WPF application that automatically generates applications based on Excel spreadsheets. I used technologies like SharePoint, Excel Services, Web Services and REST api.
